- Tablets – Sunitinib, Pazopanib, Sorafenib, Tivozanib, Everolimus, Carbozantinib, Axitinib.
- Infusions – Nivolumab, Atezolizumab, Bevacizumab, Pembrolizumab, Avelumab

Current Recruiting Trials at The Christie

OPEN:
200249
Phase 1/2
Pazopanib and Pembrolizumab.
First line Treatment RCC

OPEN
STAR
Phase 2/3
Sunitinib or Pazopanib
Standard schedule vs. stop/start
First line Treatment RCC

OPEN
Tivo-3
Phase 3
Tivozanib vs. Sorafenib
Third or fourth line Treatment RCC

OPEN
APREDICT
Phase 2
Axitinib in patients who are not suitable for a
nephrectomy
First line Treatment RCC

Opening soon
Keynote 427
Pembrolizumab
First line treatment non-clear cell and RCC

Opening Soon
Keynote 426
Pembrolizumab and Axitinib
vs. Sunitinib
First line treatment RCC

Current closed studies with active treatment

B9991002
Phase 1
Avelumab and Axitinib
First line treatment RCC

Immotion 151
Phase 3
Atezolizumab & Bevacizumab
Vs Sunitinib
First line treatment RCC

Checkmate 214
Phase 3
Nivolumab and Ipilimumab
Vs Sunitinib
First line treatment RCC

BYL719
Phase 1
BYL719 & Everolimus
Third line treatment

NEW

Kidney Cancer Support Group

Monthly meetings
Next meeting 9th February, 2017.
7 – 8:30pm
At Brooklands Church of the
Nazarene, Wendover Road,
Manchester. M23 9FG

Come to meet others,
learn a little more and
have a cuppa
(and a biscuit!)
There will be a donation
jar to cover refreshments.
